Guide for planning and follow-up of doctoral student employment time and department duties

1. First employment contract (responsible local HR person)
   The first employment contract will be set to 31 December to make the following one-year contracts to run for full calendar years, except the last that contracts the remaining time in the employment (see also point 6). Calendar-year contracts improves using Retendo as planning tool for the doctoral students.

2. The set-up of ISP (responsible study directors)
   Secure with department leader the amount of department duties available for the doctoral student during the whole education. Preferable as 0, 10 or 20 % of fulltime employment. This will then determine if the total doctoral employment time will be for 4, 4.5 or 5 years.

   When ISP is approved by head of school on IL, it is taken to the decision that department leader has approved the planned extent of department duties (0, 10 or 20 %). A motivation is also given and notified in the decision.

3. Planning of department duties (responsible department leader)
   Planning is made in good time before each semester for the full semester with the amount in the ISP. The department leader makes the plan together with the doctoral student and main supervisor as stated in the work time agreement for department duties for doctoral students. The planning in Retendo MUST be made as hours, 10 % = 85 h/half-year, 20 % = 170 h/half-year.

4. Follow-up of department duties (responsible study directors)
   Follow-up is done on last IL each semester to secure that the time according to ISP is followed in practise up to now.

5. Doctoral student control over the time remaining in their employment (responsible doctoral student)
   A tool has been developed that the doctoral students can follow-up themselves the time that remains. It can be downloaded from Teams IIT Documents/General/IIT-lokala regler och rutiner/Forskarutbildning

6. Last contract (responsible local HR)
   Local HR ask department leader to sum-up the department duties in total hours in order to calculate the remaining time in the employment. Department leader retrieves hours for teaching and other duties not counted as study time from Retendo.
