Beslut: rutin för beslut externa forskningsansökningar, IIT

Beskrivning av ärendet

Rutinen för beslut angående externa forskningsansökningar har reviderats utifrån den nya interna organisationen på institutionen och uppdateringar av delegationsordningen.

Detta beslut ersätter tidigare beslut C 2022/43.

Beredning av ärendet

Ärendet har beretts av proprefekten.

Guidelines for decision before submitting external research applications -collection of instructions from different documents and local routine at IIT

This document collects some of the most important points in central regulations and adds a local routine for preparing and making decisions before submitting external research application. Vice Chancellor has delegated to Head of School to decide on submission of external research applications when:

5.1.1.3	Besluta om ansökningar gällande extern forskningsfinansiering när: * forskaren/projektledaren är huvudsökande (enligt krav från finansiären) * medfinansiering krävs om max 500 tkr	Får ej vidaredelegeras. Bereds av proprefekt. Beslut efter hörande med IL och efter godkännande enligt *Regler för ansökningar om extern forskningsfinansiering*

Decisions are taken by Vice Chancellor when co-funding from the university exceeds 500 tkr or for other reasons addressed in the calls. Before that, Head of School must approve that the application is forwarded to Vice Chancellor decision.

4.6.1	Besluta om ansökningar gällande extern forskningsfinansiering när något av följande alternativ föreligger: - Högskolan Dalarna/rektor är huvudsökande enligt krav från finansiär - ansökan kräver medfinansiering från högskolan överstigande 500 tkr	Bereds av prefekt. Beslut ska föregås av godkännande enligt *Regler för ansökningar om extern forsknings-finansiering*

The school has widened the decision mandate by Head of School to also include applications where IIT is co-applicant, as follows:

All applications must be handled according to the rules and routines in this guideline, when Dalarna University is main applicant, co-applicant, subcontractor or in other ways participate with resources, humans or others in external applications.

The motivation to extend to take decision for all applications is that resources (personnel and if needed co-funding) must be possible to allocate if the application being granted.

A. From central document *"Rules for Applications for External Research Funding"*

B. IIT local routine before decision meeting

Internal decision by Head of School is scheduled for meeting Tuesdays from 11.30 with normally 15 minutes per application. Called to the meeting are applicant (for the whole project or for the DU part of the project), leader of the department and head of subject for the units the applicant belongs to or centrum leader if the application belong to the centre. Deputy head of school is also present in the meetings. It is also open for all ILR members to participate in person.

Complete application documents for the internal decision (PM inför beslut om inskickande av forskningsansökan till finansiär) are sent to the school administrator no later than 12.00 the Thursday before the decision meeting. Administrator calls to the meeting with agenda in BeHDa. Notify that a budget for project (DU-part in case of another unit being main applicant) must be approved and signed by the economist responsible for the department and uploaded in the PM. The applicant has the full responsibility to ensure that economic part fulfills the requirement from the funding agency when it comes to eligible costs, OH or others and contact the funding agency if such information is unclear. It is not the school´s economists that secure that.

The application documents are also sent via e-mail to the school advisory council (ILR) for comments and inputs on Thursday before the decision meeting. The members of ILR can respond with opinions before the decision meeting (at latest Monday) and the opinions are brought up at the decision meeting and are considered before the decision. ILR members can participate in person in the meeting.

The School Administrator sends the document to Vice Chancellor´s administrator after the Head of School´s decision meeting in cases where Vice Chancellor are taken the decision after approval of Head of School. Decision by Vice Chancellor are taken on Vice Chancellors advisory council (RLR) the following Monday.

C. Meeting for decision/approval by head of school

At the actual decision meeting that normally takes about 15 minutes per application, the applicant makes a short (5 min) presentation with a contextual overview and highlights important points, such as:

1) How the project contributes to develop the research environment the applicant belongs to,
2) Who, in addition to the applicant have contributed in writing substantial parts in the application,
3) How the results and knowledge can be used in education (forskningsanknytning),
4) If a PhD student will be recruited for the project; the budget needs to be clear about co-funding from the department´s internal research funding to cover parts of the doctoral studies that are <u>not</u> covered by the external project funding (could be courses and writing of the thesis),
5) How results and knowledge is relevant for the society and specifically external collaborators in the project (if such exists),
6) If the application is a resubmission (after being rejected in an earlier call) it is important to bring up and explain how the application has been improved,
7) Risk management concerning the uncertainty of personnel planning. What is the plan if the project is granted? Does the department/subject manage to cover human resources if the project is granted or is new recruitments needed.

Deputy Head of School, Department Leader and Head of Subject ask questions if needed for further clarification related to the point list above or other application specific matters.
